

ACCOUNTS PAYABLE AUTOMATION

About MAXiSoft

MAXiSoft provides innovative software to let companies streamline the way they work with documents. Effective solutions for image recognition, document creation, conversion and management.

With MAXiSoft Invoices we let companies dramatically lower the costs associated with manual data entry.

INTEGRATES WITH YOUR ERP OR DATABASE

The Challenge

Manually intensive accounts payable procedures significantly impact a company's bottom line, with companies spending huge amounts each year processing invoices, performing purchase order matches, addressing defects and responding to vendor enquiries.

The Solution

MAXiSoft Invoices converts invoices to digital format, capturing data and posting payment information to ERP system or Database

MAXiSoft Invoices, enables enterprises to significantly lower the processing cost per invoice and improve financial management. By leveraging MAXiSoft's advanced technology, you can effectively automate your accounts payable process while still retaining control.
